Declaration

Full name	Mohammed Bashier Ahmed
Registration number	25/27659
Institutional username	ug2527659@ines.ac.rw
Verification code	AI-A2-7659
Course	SWE 3513 Artificial Intelligence - Individual Assignment 2
Project	Musanze Harvest Intelligence Service

I declare that I am submitting this project under my own name and registration number, and that I take full responsibility for it.

I used the AI assistant Claude (Anthropic) during this assignment. It generated the project structure, the Python code, the tests, the README and the report generator from the assignment brief, and it helped me translate my own short explanations of one regression error, one classification error and one farm cluster into English. The details of this use are in **evidence/AI_USE.md**.

I installed and ran the project on my own computer, and the results I report (dataset fingerprint, metrics, tests and API behaviour) come from those runs.

I used no other person's submission. The dataset is synthetic and was generated from my registration digits, and no real personal data was used.

I understand that during assessment I may be asked to explain the code, the results and the model choices, and to make a small change to the code, and that the use of AI assistance does not remove this requirement.
